What is iTec?

iTec is the leading brass push-fit fitting on the Irish market.
In iTec we provide a quality product that meet the needs of technicians
and installers. It allows for an easier, faster and more cost-effective jointing solution.
The jointing process is simple: no special tools, no flux, no solder, no flame.
Equally simple to demount and can be re-used over and over.
iTec is suitable for use with all the traditional piping materials - copper, Pex etc...
